Entry level professional seeking a challenging role to leverage expertise as **Software Engineer** and to contribute to a dynamic team.

## Technical Skills

Cloud Technologies	AWS
AWS services	EC2,S3,VPC,Load Balancers
Programming Languages	Java, Python
Databases	SQL
Web Technologies	HTML, CSS
Frameworks	Hibernate, JPA
Version control	Git, Github

## Project Summary

### Hospital Management System

- Implemented a Hospital Management System focusing on organizing patient's data and resources.
- This Application is built using Java programming language and there is a MySQL database for storing patients and doctors information.
- Experience in using Hibernate for easy database interaction and to manage the data efficiently.
- Maintained a Git repository to keep track of code changes.
- Designed system structure using UML diagrams for clear understanding.
- By implementing this project I have gained experience not only in Java but also in Hibernate and MySQL.
